

Dive into a world full of light and color,
sink into the warm quartz sand,
listen to the wonderful music
and be enchanted by the noblest
aromas.

Enjoy with all your senses

ORCHESTRA OF THE SENSES

High-quality LED panel, consisting of 16.740 RGB LEDs. Each LED contains the full color spectrum of 16,7 million colors with about 4000 to 8000 lumens, depending on the wavelength. Color transitions occur smoothly and synchronized to the music

The Bose-sound system consists of two magnetically shielded satellite speakers and a subwoofer. The patented integrated signal processing system delivers full-scale sound at almost any volume with a power consumption of 60 watts.

The aroma unit is equipped with 10 refillable and replaceable fragrance cartridges. The aromas used fulfill the highest certification standards (according to AFNOR). One cartridge contains 50ml and is sufficient for approximately 270 applications. The filling level of each cartridge can be seen by a status display.

The lying area (2x1m) is filled with quartz sand (grain size 2-3mm). The integrated sensor-controlled and adjustable heating system (300 watts) provides continuous heat. The specially developed substructure affects positively for the user in form of ergonomic, spine-protecting storage.
